

# Wilshire 5000 Index Fund

As of March 31, 2017 > Wilshire Mutual Funds

## Investment Strategy

The goal of the Wilshire 5000® Index Fund is to replicate as closely as possible (before expenses) the total return of the Wilshire 5000 Total Market Index<sup>SM</sup>. Although the index holds over 3,500 securities, the fund holds between 1,500 and 3,000 securities, using sampling procedures to mimic the capitalization and sector weightings of the Index. The Wilshire 5000 Total Market Index is an unmanaged index which includes all U.S. equity securities with readily available price data. It is not possible to directly invest in an index.

## Growth of a \$10,000 Investment (Institutional Class, Since Inception)

<sup>1</sup> Returns for periods less than one year are aggregate and returns for periods more than one year are annualized. The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher. Performance data current to the most recent month-end may be obtained at [advisor.wilshire.com/wilfunds](http://advisor.wilshire.com/wilfunds). The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original costs.

<sup>2</sup> Holdings are subject to change. The Fund is actively managed on a daily basis and the securities represented may not represent the current or future composition of the portfolio.

<sup>3</sup> The Price to Book ratio is calculated based on the book value of each Portfolio security as of the end of its issuer's most recent fiscal year. The Price to Earnings ratio is calculated based on the latest 12 months earnings of each Portfolio security. The price is as of the date of this publication (3/31/2017). Beta is a measure of the Fund's sensitivity to the benchmark index. R-squared is a statistical measure that represents the percentage of a Fund's or security's movements that are explained by movements in a benchmark index. As the Fund is actively managed on a daily basis, the securities represented may not represent the current or future composition of the portfolio.

There are risks involved with investing, including the possible loss of principal. In addition to the risks associated with investing, investments in smaller companies typically exhibit higher volatility.

**Read the prospectus carefully before you invest or send money.**

Diversification may not protect against loss.

The Wilshire 5000 Total Market<sup>SM</sup> Index, is a market-capitalization-weighted index of the market value of all stocks actively traded in the United States. The index is intended to measure the performance of most publicly traded companies headquartered in the United States, with readily available price data. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees or other expenses. An individual cannot directly invest in any index.
