Wilshire Associates Incorporated, the Fund's investment ("Advisor"), has entered into a contractual agreement to limit expenses to 1.50% and 1.25% of average daily net assets for Investment Class Shares and Institutional Class Shares respectively, through April 30, 2017. The expense ratio does not reflect the ability of the Advisor to recover all or a portion of prior waivers, which would result in higher expenses for the investor. This option is available contractually to the Advisor until April 30, 2019.

¹ Returns for periods less than one year are aggregate and returns for periods more than one year are annualized. The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher. Performance data current to the most recent month-end may be obtained at advisor.wilshire.com/wilfunds. The investment return and principal value of an investment will fluctuate so that shares, when redeemed, may be worth more or less than their original costs. The performance quoted reflects fee waivers in effect, and would have been lower in their absence. Effective April 2, 2013, the Fund name, benchmark, principal investment strategies and principal risks were changed. Consequently, prior period performance may have been different if the new investment strategy had been in effect during these periods.

² Holdings are subject to change. The Fund is actively managed on a daily basis and the Fund changed its investment strategy on April 2, 2013. As a result, the securities represented may not represent the current or future composition of the portfolio.

³ The Price to Book ratio is calculated based on the book value of each Portfolio security as of the end of its issuer's most recent fiscal year. The Price to Earnings ratio is calculated based on the latest 12 months earnings of each Portfolio security. The price is as of the date of this publication (3/31/2017). Beta is a measure of the Fund's sensitivity to the benchmark index. R-squared is a statistical measure that represents the percentage of a Fund's or security's movements that are explained by movements in a benchmark index. As the Fund is actively managed on a daily basis, and the Fund changed its investment strategy on April 2, 2013, the securities represented may not represent the current or future composition of the portfolio.

There are risks involved with investing, including the possible loss of principal. In addition to the risks associated with investing, investments in smaller companies typically exhibit higher volatility. In addition to the normal risks associated with investing, international investments may involve risk or capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

You should consider the Fund's investment objectives, risks, charges, and expenses carefully before you invest. The Fund's summary or full prospectus, which can be obtained by calling 1-866-591-1568, contains this and other information about the fund.

Read the prospectus carefully before you invest or send money.

Diversification may not protect against loss.

The MSCI ACWI ex USA Investable Market Index captures large, mid and small cap representation across 22 of 23 Developed Markets countries (excluding the United States) and 23 Emerging Markets countries. The index covers approximately 99% of the global equity opportunity set outside the US. Unlike a mutual fund, the performance of an index assumes no taxes, transaction costs, management fees or other expenses. An individual cannot directly invest in any index.
