

## Strategy

Wilshire Funds Management incorporates an actively managed allocation overlay utilizing fixed-income mutual funds to provide investors with a multi-sector portfolio that seeks to meet its yield target, outperform its primary benchmark (Bloomberg Barclays Capital Aggregate Bond Index) and maintain a risk profile similar to the Lipper Multi-Sector Income Funds Average.

## Fund Allocations

Fund	Allocation
Lord Abbett Core Fixed Income	53.0%
Lord Abbett Floating Rate	25.0%
Lord Abbett High Yield	10.0%
Lord Abbett Income	10.0%
Lord Abbett USG & GSE Money Market Fund	2.0%

## Portfolio Information

### Goal

The Portfolio seeks to provide an actively managed “go anywhere” solution with a yield target of 10-Year U.S. Treasury yield + 150 bps<sup>1</sup>.

## Portfolio Characteristics

Distribution Yield <sup>2</sup>	4.07%
Yield Target <sup>1</sup>	4.33%
10-Year U.S. Treasury Yield	2.83%
Underlying Fund Expense <sup>3</sup>	0.75%
Effective Duration (Yrs.)	4.42

<sup>1</sup> There is no guarantee that this portfolio will achieve the targeted yield over any given period.

<sup>2</sup> An indication of the current dividends and interest vs. the current market value of the holdings. The yield represents the current amount of income that is being generated from the portfolio without liquidating the principal or capital gains of the portfolio. However, the yield will fluctuate daily and current or past performance is not indicative of future results. The yield is calculated before the application of Wilshire Fund Management’s Strategist fee, or any additional platform fees, advisory fees or any other applicable fees.

<sup>3</sup> Underlying Fund Expense does not include Wilshire Fund Management’s Strategist fee. Platform fees, advisory fees, and other fees or charges may apply. Underlying Fund Expense reflects the weighted average underlying fund expense ratios as of 4/30/2018 and is subject to change due to various factors including changes in the underlying fund allocations and changes in underlying fund expense ratios.

## Credit Quality Distribution

Rating	Allocation
Agency/AAA	38%
AA	3%
A	9%
BBB	13%
BB	12%
B	18%
< B	6%
NR	1%

## Maturity Breakdown

Maturity	Allocation
Short Term	6%
1-2.99 Yrs.	15%
3-4.99 Yrs.	18%
5-6.99 Yrs.	25%
7-9.99 Yrs.	24%
10+ Years	12%

## Distribution Yield<sup>2</sup>

## Performance

As of 5/31/2018	May	QTD	YTD	1 Year	3 Years	5 Years	Since Inception (6/30/2011)
Active Income (Taxable)	0.26%	-0.04%	-0.80%	0.89%	2.25%	2.83%	3.48%
Primary Benchmark*	0.71%	-0.04%	-1.50%	-0.37%	1.39%	1.98%	2.62%

\* Primary Benchmark: Bloomberg Barclays Capital Aggregate Bond Index

### Information regarding performance data

The performance results above should be reviewed in the context of the markets applicable to the investment strategies noted. All returns for periods greater than one year are annualized. Performance results are based on model portfolios maintained by Wilshire Funds Management (WFM). The models have been maintained in such a way as to record transactions at the same time they occur in actual client accounts in an attempt to approximate client returns as closely as possible. However, there are certain limitations in model performance as the model results may not completely represent the actual trading of securities in a client account. The results reflect reinvestment of all dividends and interest. These results reflect the deduction of the maximum 0.20% Strategist fee that WFM charges third party firms providing this advisory service to end clients. However, actual client results will be lower based on the imposition of platform fees, advisory fees and custodial fees by these firms. As with all investments, there is no guarantee that the investment strategy will be successful and investors should be aware that investments can lose money, including principal, so that an investor could end up with less money than was invested.

## About Wilshire

Wilshire Associates Incorporated (Wilshire®), a leading global, independent investment consulting and services firm, provides consulting services, investment analytics, and customized investment solutions to plan sponsors, investment managers, and financial intermediaries. Founded in 1972, Wilshire became an early innovator in developing the application of investment analytics and research to investment management for the institutional marketplace. Based in Santa Monica, California, Wilshire provides services to clients in more than 20 countries representing approximately 500 organizations. Wilshire Funds Management, the global investment management business unit of Wilshire, delivers Wilshire Advisor Solutions, which utilize Wilshire's institutional expertise to help financial institutions design and implement solutions for individual investors.

### A Note about Risk: Asset Allocation and Fixed Income Investments

The Portfolio is actively managed and is subject to change. The Portfolio is designed to invest in mutual funds that engage in a variety of investment strategies involving certain risks, and are subject to the particular risks of the mutual funds in proportion to which the Portfolio invests in them. Performance of any selected mutual fund may be lower than the performance of the asset class that the mutual fund was selected to represent.

Portfolios that invest in fixed income securities are subject to several general risks, including interest rate risk and credit risk, which could reduce the performance of the Portfolio. These risks may occur from fluctuations in interest rates, a change to an issuer's individual situation or industry, or events in the financial markets.

As interest rates fall, the prices of fixed income securities tend to rise. As rates rise, prices tend to fall.

Fixed income securities with credit ratings below BBB are considered to be "high yield securities," sometimes called "junk bonds," and carry increased risks of price volatility, illiquidity, and the possibility of default in the timely payment of interest and principal.

### Important Information

Wilshire Active Income Portfolios are a suite of mutual fund asset-allocation models designed by Wilshire Funds Management (WFM), a business unit of Wilshire Associates Incorporated ("Wilshire®"), to invest across a range of mutual funds.

WFM uses an active tactical asset-allocation strategy to manage the Wilshire Active Income Portfolios. WFM's process constructs portfolios in ways that seek to outperform their specific benchmarks. There is no guarantee that any of the Wilshire Active Income Portfolios will meet or exceed their investment objectives or performance benchmarks. Asset allocation portfolios do not ensure a profit or protect against loss.

There is no guarantee that any of the Wilshire Active Income Portfolios will provide the targeted income level over any given period. The actual dollar amount of income received by an investor could vary substantially from one year to the next and over time depending on several factors, including the interest-rate environment, the performance of funds in the portfolio and the financial markets in which they invest, and the allocation of a Wilshire Active Income Portfolio across the different funds selected. Additional platform and advisory fees and charges may apply which, if assessed, will reduce the overall performance and the yield of the Wilshire Active Income Portfolio. In pursuing each portfolio's primary investment objective to deliver targeted income and the yield, it is possible for a portfolio to experience investment losses and reduction of principal.
